

Jayden Allen

Provo, Utah | jaydentallen30@gmail.com | (406)694-5245 | www.jaydenallen.dev

Detail oriented developer with hands on experience in full stack development, systems integration, AI integration, and cloud-based infrastructure. Proven leadership in software teams, a strong foundation in development, and a passion for building innovative, scalable solutions.

Education

Bachelor of Computer Science | 3.56 GPA

Graduated December 2025

Brigham Young University- Provo, Utah

High School Diploma | Valedictorian

2019

Baker High School- Baker, Montana

Work Experience

Fund Launch:

Full Stack Developer (Contractor):

February 2025-August 2025

- Generated over **\$2 million in sales** between May–Aug 2025 through a financial education product built as part of a 2-person development team (React/Next.js).
- Onboarded **1,000+** premium plan clients who contribute to over **\$25 million** in total revenue across company offerings.
- Drove a strategic shift expanding Fund Launch into software development, enabling the hiring of a CTO and establishing a focused engineering team.
- Designed and implemented scalable Supabase backed storage architecture to support long term growth across multiple products.
- Led security architecture efforts, including OIDC (OpenID Connect), OAuth 2.0, Postgres RLS, Content Security Policies, and custom safeguards to protect sensitive financial data.
- Integrated and documented third-party services including Salesforce, Auth0, Zoom, Slack, Go High Level, and Paper OS for cross-platform workflows.
- Delivered MVPs on tight deadlines, consistently exceeding expectations.

BYU Office of Information Technology:

Integrations Developer and Student Team Lead:

September 2023-April 2025

- Built and maintained production integrations connecting enterprise ERP, CRM, and internal systems.
- Designed data pipelines for transformation, synchronization, validation, and failure handling.
- Worked with enterprise data models and APIs to ensure secure, reliable data exchange.
- Developed integrations using ETL platforms and custom services, translating business logic into maintainable workflows.
- Analyzed integration metrics and implemented improvements reducing failures and operational overhead.
- Led and mentored a team of 7 student developers, conducted code reviews and technical onboarding.
- Coordinated with vendors and international partners to deliver projects on schedule.

Technical Skills

Languages:	TypeScript, Java, JavaScript, SQL, Python, C++, Visual Basic
Frameworks & Tools:	React, Next.js, Flask, Docker, Git, Jupyter Notebooks, Postman, NPM, PIP, Tailwind, LangChain, Playwright, Vercel, Cloudflare
Databases:	Postgres, Oracle, MySQL, MongoDB, SQLite, Supabase
API Protocols:	REST, SOAP, GraphQL, OIDC
ETL & Integrations:	Informatica Cloud, PowerCenter, Boomi, AWS, Workday, Salesforce, Dremio, Auth0, Netsuite, Stripe
DevOps & Scripting:	Bash, PowerShell, Swagger, OpenAPI

Achievements

Business Professionals of America Programming State Finalist and National Competitor

- Top 5 Finalist at State in Montana in Visual Basic Programming 2018, 2019
- Placed in top 50 at Nationals in Visual Basic Programming 2018, 2019
- Top 5 Finalist at State in Montana in C++ Programming 2019
- Placed 11th overall at Nationals in C++ Programming 2019

Personal Projects

Founder of HasteAPI – Web based AI SaaS | www.hasteapi.com (early access)

- Architected and launched a full stack SaaS platform enabling users to automatically generate functional API endpoints via natural language using AI.
- Engineered a secure multi provider API management system with keys, analytics, rate limiting, and cost controls.
- Created a full API system with versioning, automated docs, and advanced configuration tools.

The AD Grid – Full Stack Web Application | www.theadgrid.com

- Built a live, scalable ad grid platform (10,000×10,000 coordinate system) enabling users to purchase and display custom ads.
- Achieved fast and scalable response times using optimized PostgreSQL indexing, lazy loading, and intelligent gap filling.
- Integrated Stripe with secure payment validation, fraud prevention, and real time webhook handling.
- Deployed on Vercel with Leaflet.js UI, SVG upload, RLS, CSPs, analytics, and moderation/accessibility tools.

Automated Video and Audio Transcription Compiler

- Created a Python automation pipeline using Coqui TTS, MoviePy, and OpenCV to generate TTS narrated and subtitled short form videos.
- Enabled user driven voice synthesis with optional speaker selection using Coqui TTS, and real time sentence segmentation using the PySBD module, along with synchronized overlaid subtitles.
